

Nexa HomeHub Mini

Product ID: NEX-1001 | Category: Smart-home voice hub

Description

- A compact Wi-Fi hub that brings compatible lights, plugs, sensors, and routines into one voice-controlled dashboard. It supports room-based controls and scheduled automations for a small home or apartment.

Key features

- 2.4 GHz Wi-Fi setup with Bluetooth-assisted pairing.
- Voice commands, mobile dashboard, and routines.
- Up to 40 compatible devices on a single home profile.

Setup

- Connect the supplied USB-C power cable and wait for the status ring to pulse blue.
- Open the Nexa Home app, choose Add Device, and scan the QR code on the base.
- Join a 2.4 GHz network, assign a room, then add compatible devices from the Devices tab.

How to use

- Say a command such as 'Turn on living room lights,' or select a room in the app.
- Create routines from Automations; for example, turn lights off at 11:00 PM.
- Check the dashboard activity log when a routine did not run as expected.

Error codes and resolutions

E101: Wi-Fi connection failed.

Confirm a 2.4 GHz network is available, move closer to the router, then restart setup.

E118: Device limit reached.

Remove an unused accessory or create a separate home profile.

E201: Voice service unavailable.

Verify internet access and restart the HomeHub from Settings > System.
